Att: All Customers operating MEMbus Production Logging Tools,

17 Oct 2007

In an effort to provide the best support possible for our growing product line offerings, effective January 1, 2008, Sondex will no longer offer technical support or the availability of replacement parts for any tools or sensors operating on the MEMbus telemetry platform. Sondex launched Production Logging tools on the Ultrawire™ Ultralink™ platform in 2001. Since that time, Well Integrity tools and further Production Logging tools have all been produced to operate on this higher speed platform. The previous generation, MEMbus logging tools, for some time now, have been considered obsolete and no longer in manufacture. As of January 1, 2008, spare part availability will be limited to supplies on hand only.

Customers, who wish to place “look ahead” irrevocable MEMbus part orders, should be sure to place orders before the end of the 2007 calendar year.

A handwritten signature in blue ink that reads "S. A. Large". The signature is written in a cursive, flowing style.

Stuart Large

Product Manager, Production Logging and Well Integrity
