

Field Engineers ULTRAWIRE RBT COURSE

14th to 18th July 2008 (Calgary, Canada)

This 5-day course is orientated towards Field Engineers and is designed to give them an in-depth knowledge of the tools; how they work, how to run them, how to maintain them, what information we gain from the logs and how this information is used.

Summary of Topics Covered

- Introduction to Ultrawire Radial Cement Bond tools.
- What parameters the tools measure and what information they give.
- Field maintenance and basic troubleshooting.
- Logging software.
- Surface Readout and Memory Operation
- Tool Maintenance
- Interpretation
- On-Site Test Well practice
